

JR. APPRENTICE PROGRAM

Students, age 12-18, learn how to create financial independence through developing their own products and services. The participants engage in an in-depth exploration of the business planning process and develop investor-ready business plans that include writing their mission/vision, product/service development, operations plan and a financial plan. They also receive hands-on practical experience of operating a business in the Jr. Apprentice Program store, C.A.U.S.E. for Elegance. The C.A.U.S.E. (Causes All United to Serve and Empower) Network consists of Designers who create beautiful and exquisite things, Specialists, Sponsors and Organizations.

In their store, the students are learning from industry professionals with 20+ years experience in many disciplines

Videography

Through this program, we provide Mentors/Specialists who work with the students providing directions and helping them find their passion as they build a resume to create jobs, find a job, and enhance their opportunities for higher learning and skills development. As they are learning these skills, we also inspire them to understand that in pursuing their life's endeavor, they must first understand the principle of giving. Therefore, all funds raised through the sale of products/services go toward the Camp Village Scholarship Fund (Camperships) for students.
